

Frontend Engineer

About Rheaply

Founded in 2016, Rheaply, Inc. is a Chicago-based technology company focused on solutions for making organizations more efficient, sustainable, and connected. Rheaply has developed and launched the only exchange technology for professionals to share their ideas and surplus resources with colleagues as to reduce time, costs, as well as unnecessary environmental waste called in Asset Exchange Manager (AxM). On Rheaply's AxM, users from all departments can access resources and expertise from colleagues in the same organization or beyond - think of an internal marketplace. Recently, Rheaply is an alum of Google for Startups, Techstars Chicago, and 1871's Inaugural Advance Member Program (AMP). In addition, Rheaply has been featured in Nature, Forbes, VERGE/Greenbiz, and chosen as a 10 Big Idea in Innovation by Chicago Magazine, Top 50 startups to watch by BuiltIn Chicago, a Circular Economy Solver by MIT SOLVE, and received the 2019 Sustainable Procurement Leadership (SPLC) Award for Circular Economy leadership among other notable awards and recognitions. Rheaply is building the technology necessary to scale the \$4.5 trillion dollar circular economy of the future in order to bring about global resource efficiency and eliminate waste.

About Role

As we continue to expand our business, we are seeking a Frontend Engineer to join our current Product team. We have a well established customer base and are growing our platform and offerings. As a frontend engineer you will be a key member on a talented team that delivers Product at Rheaply. Currently our main offering is a Progressive Web App (PWA) and is developed for both desktop and mobile. You'll work shoulder-to-shoulder across functional areas of the company and your feedback and perspective will help contribute to a product our customers truly love.

Responsibilities

- Build features, bash bugs, and contribute to an ever evolving suite of engineering tools, methodologies, and systems.
- Collaborate with the entire product team (backend engineering, quality assurance, and ux design) to scope, manage, and deliver product
- Be comfortable working across our entire stack (frontend in Aurelia; backend in NodeJS)

Minimum Qualifications

Rheaply

- Proven track record building high quality web applications
- Have a strong understanding of HTML, CSS, and JavaScript
- Strong understanding of fundamental technologies of the web and browser
- Comfort working independently in a fast-paced, changing, and loosely-structured environment

Preferred Qualifications

- Bachelor's Degree in Computer Science or related field
- Experience using a user centered design process and iterative prototyping
- A demonstrated interest or experience with graphic and/or UI design
- A demonstrated interest in sustainability or circular economy (e.g., coursework, work or internship experience, involvement in student groups)
